

LIFESTYLE

— SERIES —

Everlon believes memorialisation is more than a name and date upon a plaque. The lifestyle series is vast and encompasses background images designed to reflect what the individual loved the most, whether it was the arts, religion, sports, adventures or landscapes.

When designing the plaque, the family simply chooses one of the preselected background images that best reflected their loved one's lifestyle with the appropriate wording to be placed over the images. A loved one no longer has to be remembered by just a few lines of text, their memorial can be a true reflection of the individual thanks to the Lifestyle Series.
