

# CYLINDER

— SERIES —

A bespoke memorial cylinder designed to complement the organic lines and shapes found in nature. Created for existing bushland cemeteries or used to create new sections within current cemeteries, the cylinder can be used to create a unique variation in memorial sections. The different heights and designs allow a controlled variety within the section while still maintaining a common theme. A plaque finishes off the cylinder memorial with the bronze beautifully contrasting the stainless steel ensuring the focus of the memorial is not lost.

The cylinder's internal container is suited to hold a 3L round ash container which is secured permanently into the ground and covered with the stainless steel outer case using tamper proof screws.

## Available Sizes

S

460 mm height

M

530 mm height

L

600 mm height

XL

670 mm height

All bronze plaques are 158 x 168 mm and include 8 lines of text.
